

# **Biographical Sketch** *of* **Robert Wendoll**

*July 2007*

Robert Wendoll is the Director of Environmental Affairs for Dunn-Edwards Corporation, Los Angeles, California. He has been with Dunn-Edwards for twenty-five years, out of a total of thirty-three years in the paint and coatings industry. His current duties include monitoring environmental, health & safety laws and regulations, determining specific applicability to Dunn-Edwards, and designing and implementing compliance measures and programs. He also has frequent interaction with legislators and regulators involved in the development of new or amended laws and regulations.

From 1990 to 1999, Mr. Wendoll was the Chairman of an industry group known as EL RAP (the Environmental Legislative & Regulatory Advocacy Program of the California Paint & Coatings Industry Alliance). He was also a member of the California Paint Council Steering Committee, has participated in the Community Air Quality Task Force of the Economic Development Corporation of Los Angeles County, the California Integrated Waste Management Board's Paint Recycling Task Force, and U.S. EPA's former Architectural Coatings Regulatory Negotiation ("Reg-Neg") Committee. He is currently serving as the Private Sector Co-Chair of the Executive Steering Committee of NARSTO (a North American international consortium of government, industry and academia for atmospheric research to support air quality management), and was recently Acting Co-Chair of its Reactivity Research Working Group. He is also currently participating in the University of Massachusetts Product Stewardship Institute's "Paint Product Stewardship Initiative" on management of unwanted leftover paint.

Mr. Wendoll is a native of Chicago, Illinois, a graduate of the University of California at Berkeley (Bachelor of Arts in Architecture & Art, 1971), and a current resident of Long Beach, California. His wife is a Diagnostic Imaging Specialist, and they have a college-age daughter.
